

# NAPOLEON CRUSHING CANNON

LEVEL: MEDIUM

EVIL MASTER #3

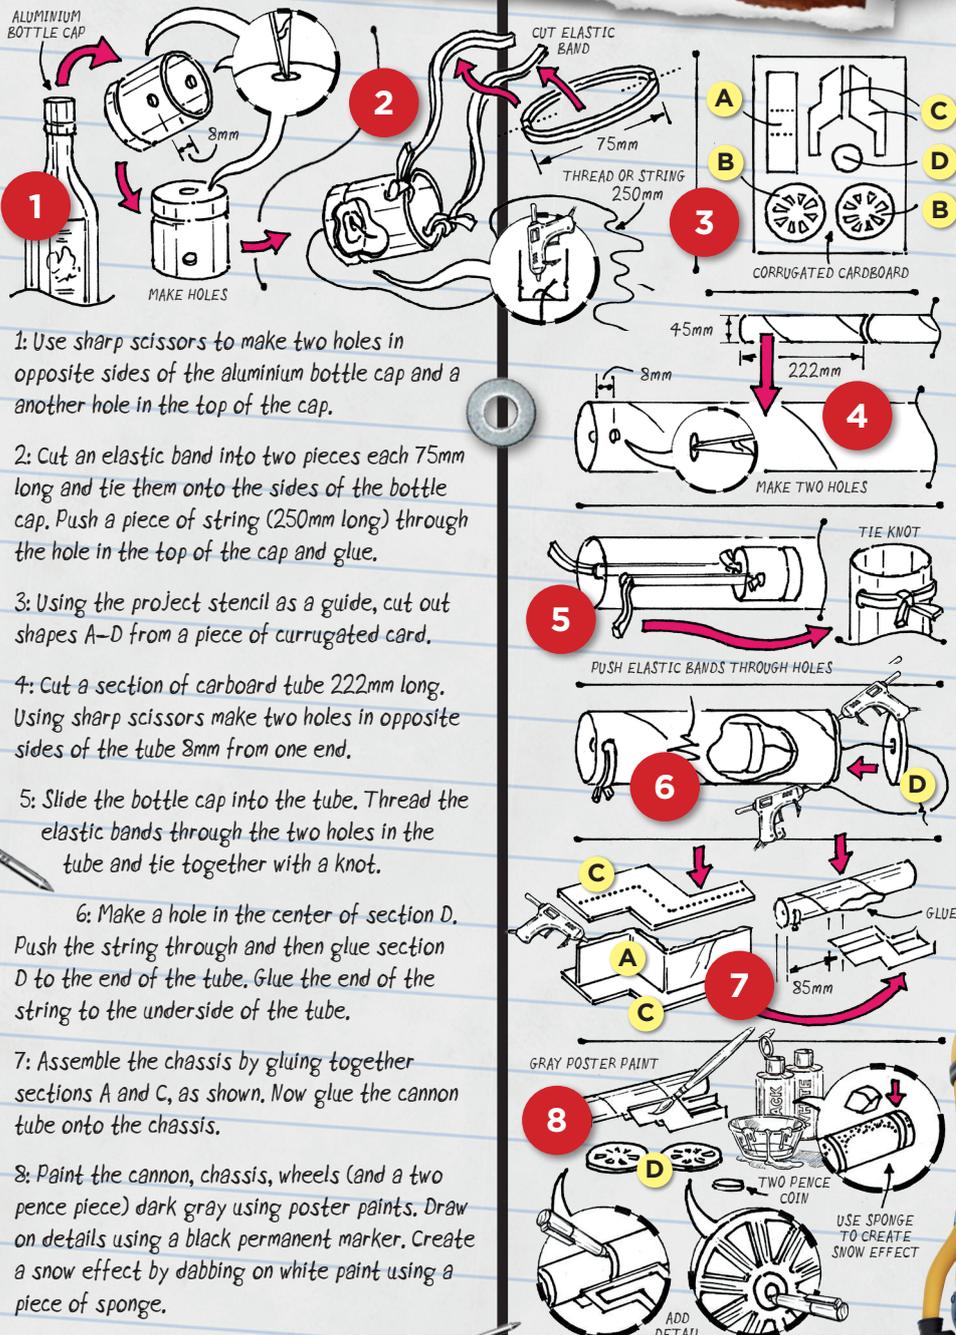

Ahhhh!

Blasphemy! Napoleon with this cool cannon and re-enact the demise of the Minions' third evil master (and if you get bored of that try aiming for Mum or Dad!)

## MATERIALS

- Cardboard wrapping paper tube (approx. 45mm diameter)
- Small corrugated cardboard box
- 1 x aluminium bottle cap
- 1 x elastic band 75mm long
- 1 x A4 210gsm card
- Thread or string
- Poster paints
- Permanent marker
- Pencil and compass
- Glue gun
- Scissors and craft knife

ELASTIC BAND POWERED CATAPULT CANNON!

1: Use sharp scissors to make two holes in opposite sides of the aluminium bottle cap and another hole in the top of the cap.

2: Cut an elastic band into two pieces each 75mm long and tie them onto the sides of the bottle cap. Push a piece of string (250mm long) through the hole in the top of the cap and glue.

3: Using the project stencil as a guide, cut out shapes A-D from a piece of corrugated card.

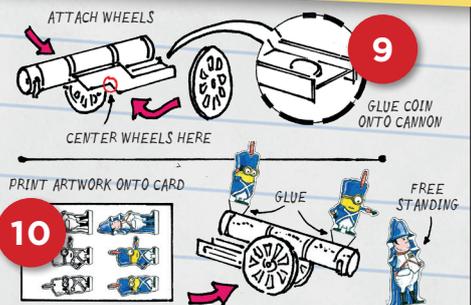

4: Cut a section of cardboard tube 222mm long. Using sharp scissors make two holes in opposite sides of the tube 8mm from one end.

5: Slide the bottle cap into the tube. Thread the elastic bands through the two holes in the tube and tie together with a knot.

6: Make a hole in the center of section D. Push the string through and then glue section D to the end of the tube. Glue the end of the string to the underside of the tube.

7: Assemble the chassis by gluing together sections A and C, as shown. Now glue the cannon tube onto the chassis.

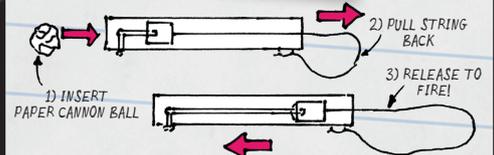

8: Paint the cannon, chassis, wheels (and a two pence piece) dark gray using poster paints. Draw on details using a black permanent marker. Create a snow effect by dabbing on white paint using a piece of sponge.

9: Attach the wheels to the chassis using glue. Glue the two pence piece on to the top of the chassis (it stops the cannon from tipping over).

10: Print the artwork onto white card and cut it out. Glue the minions onto the cannon and leave Napoleon freestanding.

## HOW TO PLAY

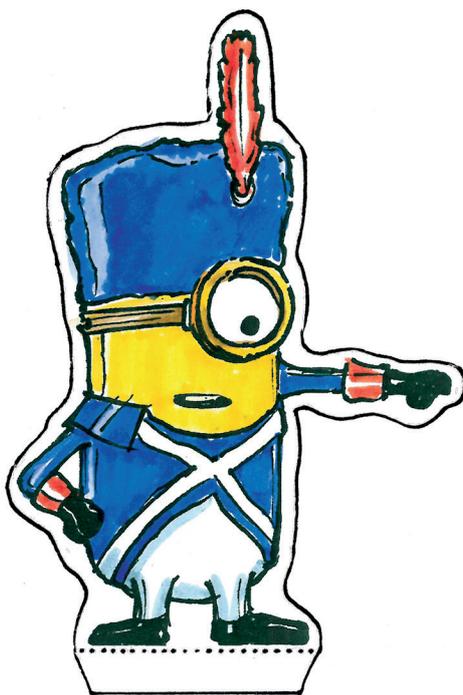

Scrunch up a small piece of paper to create the cannonball. Push the cannonball into the bottle cap. Pull the string back (keep going until the elastic bands are nice and taut). Now release the string and watch your cannonball fly.

Try aiming aiming the cannon at Napoleon and re-enact the scene from the trailer!
